# Rescue rainy recess

The class has to stay at their desks. The draft says to throw a paper ball. Which clue did it miss?

## Before class

Open an installed copy of Studio on the teacher computer. From Home, choose **Try a classroom challenge**, then **Rescue rainy recess**. Project the challenge or read it aloud.

Plan for about 10-15 minutes. The answers are prepared and the app makes no model requests during this challenge.

**On paper.** Give students page 2 and a pencil. Have partners read the clues, then cover the draft until they've picked a game. They can write a fix and copy it into the next prompt.

## Lead the activity

1. **Pick a game.** Read the clues. Ask partners which game fits the rules and why. Then reveal the first answer and find the words it passes into the next prompt.
2. **Check the draft.** Show the paper basketball suggestion. Ask which clue it missed. Agree on one sentence that fixes it.
3. **Find your fix.** Enter the class's sentence and choose **Save my fix**. Have a student point to the exact words in the next prompt.
4. **Compare ideas.** Reveal the prepared example. Ask which clues back up each version and whether both ideas could work.

## Show what carries forward

Sample wording for the teacher. Use the class's sentence during the activity.

| Clue | Sample fix | Next prompt excerpt |
| --- | --- | --- |
| Everyone stays at their desk. No throwing. | **Let's draw robots at our desks.** | **Let's draw robots at our desks.** Write a quick announcement with simple directions. |

## Ask before you finish

"Which words went into the next prompt? What new job did that prompt give the AI?"

# Your class needs a game

Rain moved recess indoors. You're picking a game the class can play right now.

### Read the clues

**A.** The gym is full. All 26 kids have to stay at their desks. The teacher says no throwing.

**B.** Paper basketball got 11 votes. Robot drawing got 8. Seated charades got 7.

**C.** Everyone has a sheet of paper and a pencil.

### Find the mistake

**Prepared draft**

"Let's play paper basketball. It got the most votes! Crumple your paper into a ball and toss it into the recycling bin from your desk."

Which clue did the draft miss? Tell a partner what you'd change.

### Write your fix

Write one sentence that gives the class a game that fits the rules.

### Carry your answer into the next prompt

A prompt is what you ask AI to do. Copy your sentence to finish the first line.

**Use this game choice**

Check it against the class rules. Write a quick announcement with simple directions.

Point to the words that came from your answer. What new job does the prompt ask for?

Make the next step better.
